Open Text Fax Server (RightFax), version 9.4

The Market-leading Fax Server and Electronic Document Distribution Software

What is the Open Text Fax Server (RightFax)?

The world leader in computer-based faxing solutions; the Open Text Fax Server and Open Text Fax Server end-user applications replace fax machines and automate document delivery.

How Open Text Fax Server Works

Fax Server 9.4 is an efficient, reliable and secure way for organizations to send and receive documents from virtually any application. The three main uses for Open Text Fax Server are network faxing, document process automation from business applications such as ERP, and faxing from MFPs.

WHY USE Open Text Fax Server?

Save Money - Significantly reduce document delivery costs by eliminating the need for paper-based delivery, stand-alone fax machines and associated maintenance, supply, equipment and labor costs.

Save Time - Reduce the time it takes your employees to exchange documents with customers or suppliers—resulting in faster sales cycles, quicker customer service and improved efficiency.

Provide Better Document Security - A trusted and reliable document delivery solution helps you comply with government regulations and safeguard information security and privacy.

Current Issues

Many organizations rely on stand-alone fax machines, standard postal service or express services to deliver vital business documents. Examples include loan applications, sales proposals, purchase orders, contracts, invoices, statements, reports and general correspondence. There are a number of challenges related to this:

High document distribution costs

Using postal delivery, manual fax and/or express services can be costly, especially as the volume increases. Inefficient business processes Just one example: If a 25-person organization manually faxes just 30 two-page documents daily, it's squandering 1,000 staff hours annually.¹

Compliance issues

For compliance and risk-reduction purposes organizations are under increasing pressure to use tamper-resistant document delivery systems that provide secure delivery, notification, history and audit trail.

Lack of integration with other applications

Email, desktop, CRM, ERP, host/legacy, health information systems, MFPs etc.—all generate documents that must be delivered or received in a timely, reliable and secure fashion.

BENEFITS OF OPEN TEXT FAX SERVER

Saves money by reducing paper, phone lines, modems, stand-alone fax machines and related supplies	One brokerage firm eliminated 25 stand-alone fax machines using Fax Server 9.4. They estimate the total Return on Investment (ROI) at close to half-a-million dollars.
Increases productivity by allowing users to fax directly from business applications	The district attorney's office in a large county government reduced the time to send a fax from 15 minutes to just seconds.
Shortens the business cycle by speeding document delivery	A mortgage industry service provider reduced the time to process a loan by two business days.
Helps with compliance by providing a secure place for managing all document delivery	A managed healthcare organization complied with the US healthcare privacy law (HIPAA) by using Open Text Fax Server as a centralized hub to securely exchange personal health information.
Automates fax, email and print delivery from key business applications	One manufacturer automated delivery of purchase orders and other documents by integrating Open Text Fax Server with desktop, email and ERP applications.

Why Choose Open Text Fax Server?

- Open Text is the leading fax server vendor in the world. (Based on acquisition of Captaris.)²
- Open Text Fax Server is also the leader in each market segment: Enterprise, Midsized and Small Business.³
- Open Text Fax Server is used by every industry in all sizes of companies with customers in financial services, healthcare, government, manufacturing, legal and virtually all other industries.
